

**PARTNERSHIP & SHARE
PARTNERSHIP****KEY NOTES & Short Cuts**

- **Partners :** Any business or organization run by more than one person, that participants are called partners
- **Working Partner :** A person invest some capital in the business and also works in the business is called a working partner
- **Sleeping Partner :** A person just invest some capital in the business and does not involve in the business is called a sleeping partner
- **Simple Partnership :** All the partners invest their capitals for equal time period, it is called a simple partnership
- **Compound Partnership :** The partners invest their capitals for different time periods, it is called a Compound Partnership
- **Profits ratio = Capital x Time period**

- A & B, two Partners : Profits ratio
 $A : B = A's \text{ Capital} \times \text{Time} : B's \text{ Capital} \times \text{Time}$

$$= \frac{A's \text{ Capital} \times \text{Time Period}}{B's \text{ Capital} \times \text{Time Period}}$$

- If the time periods are equal, then
Capitals Ratio = Profits ratio
- If the capitals are equal, then
Time periods ratio = profits ratio

- If both Capital & Time periods are equal, then
Profits ratio = 1 : 1 (Profits divided equally)
- If the time periods are not given for the given partners, assume their time periods are equal,
then Capitals ratio = Profits ratio
- Profits ratio A : B : C =
A's C x T : B's C x T : C's C x T

**APTITUDE &
REASONING Books are
Secret weapons to
crack the Aptitude test
of any MNCs**

MNCs Specific Questions (All Models)

1. A and B starts a business by investing Rs.60,000 and Rs.80,000 respectively. At the end of the year, if A's profit is Rs.15000 then find the total profit in the business ?

$$A : B = 3 : 4$$

$$3 \text{ ----- Rs.15000 (x5000)}$$

$$7 \text{ ----- ? = } 7 \times 5000 = 35000$$

2. A and B starts a business by investing Rs.20,000. At the end of the year, their profits are in the ratio 3 : 1. Find A's capital in the business ?

(Here time periods are equal)

Capitals ratio = Profits ratio

$$A : B = 3 : 1$$

$$4 \text{ ----- Rs.20000 (x5000)}$$

$$A = 3 \text{ ----- ? = } 15000 \text{ (x5000)}$$

3. A starts a business by investing Rs.30000. After 4 months B joins with a capital of Rs.40000, at the end of the year they get a profit of Rs.51000. Find B's share in the business ?

$$A : B = 30000 \times 12 : 40000 \times 8 = 9 : 8$$

$$17 \text{ ----- Rs.51000 (x3000)}$$

$$8 \text{ ----- ? = } 24000 \text{ (x3000)}$$

4. A and B starts a business by investing Rs.50000 and Rs.40000 respectively. After 10 months A leaves from the business. At the end of the year B gets a profit of Rs.72000, then find the total profit in the business ?

$$A : B = 50000 \times 10 : 40000 \times 12 = 25 : 24$$

$$B, 24 \text{ ----- Rs.72000 (x3000)}$$

$$(24+25 = 49) \quad 49 \text{ ----- ? = } 49 \times 3000 = 147000$$

5. A and B starts a business by investing Rs.30000 and 40000 respectively. After 4

months A reinvest Rs.10000, but B withdrawn Rs.10000, find the profits ratio at the end of the year ?

$$A : B = (30000 \times 4 + 40000 \times 8) : (40000 \times 4 + 30000 \times 8) \\ = 11 : 10$$

6. A and B starts a business by investing Rs.40000 and Rs.50000 respectively. After 3 months, A increases his capital by 25%, but B decreases his capital by 20%. Find the profits ratio at the end of the 2nd year ?

$$A : B = (40000 \times 3 + 50000 \times 21) : (50000 \times 3 + 40000 \times 21) \\ = 39 : 33 = 13 : 11$$

7. A and B capitals are in the ratio 4 : 5. After 4 months A increases $\frac{1}{4}$ th of his capital, but B decreases $\frac{1}{5}$ th of his capital, find the profits ratio at the end of 1 year ?

$$\begin{aligned} \text{Capitals A, B} &= 4k, 5k \\ \text{Profits ratio A : B} &= (4k \times 4 + 5k \times 8) : (5k \times 4 + 4k \times 8) \\ &= 14k : 13k \\ &= 14 : 13 \end{aligned}$$

8. A starts a business by investing Rs.40000, after some time B joins with a capital of Rs.50000. At the end of the year their profits are in the ratio 6 : 5.

- i) How long B's capital is used in the business ?
ii) When did B joined in the business ?

$$\frac{A's \text{Capital} \times \text{Time}}{B's \text{Capital} \times \text{Time}} = \text{Profits ratio}$$

$$\frac{40000 \times 12}{50000 \times T} = \frac{6}{5}$$

$$T = 8 \text{ Months}$$

- i) B invested his capital for 8 months
ii) B joined after 4 months

9. A and B starts a business by investing Rs.20000 and Rs.30000 respectively. 10% of profit goes to charity, the remaining profit is to be divided according to their capitals. If B's share is Rs.27000, then find the total profit in the business ?

$$\begin{aligned} A : B &= 2 : 3 \\ 3 &\text{ ----- Rs.27000 (}\times 9000\text{)} \\ (4+3=7) \quad 5 &\text{ ----- ? = 45000 (}\times 9000\text{)} \\ 90\% &\text{ ----- 45000 (}\times 500\text{)} \\ 100\% &\text{ ----- ? = 50000 (}\times 500\text{)} \end{aligned}$$

10. A and B starts a business by investing Rs.40000 and Rs.50000 respectively. A

takes 20% of profit for running the business, the remaining profit is to be divided according to their capitals. If B's share is Rs. 40000, then find the total profit in the business ?

$$\begin{array}{rcl}
 & A : B = 4 : 5 & \\
 (B = 5) & 5 \text{ -----} & 40000 \quad (\times 8000) \\
 (4+5 = 9) & 9 \text{ -----} & ? = 72000 \quad (\times 8000) \\
 & 80\% \text{ -----} & 72000 \quad (\times 9000) \\
 & 100\% \text{ -----} & ? = 90000 \quad (\times 9000)
 \end{array}$$

11. A and B starts a business by investing Rs.30000 and Rs.40000 respectively on the condition that, 40% of profit is to be divided equally, the remaining profit is to be divided according to their capitals. If the difference of their shares is Rs.12000, then find the total profit in the business ?

$$\begin{array}{rcl}
 & A : B = 3 : 4 & \\
 (4-3 = 1) & 1 \text{ -----} & 12000 \\
 (4+3 = 7) & 7 \text{ -----} & ? = 84000 \\
 & 60\% \text{ -----} & 84000 \quad (\times 1400) \\
 & 100\% \text{ -----} & ? = 140000 \quad (\times 1400)
 \end{array}$$

12. A, B and C rent a shed for Rs.50000 for 1 year. A put 30 Oxen for 4 months, B put 40 Oxen for 5 months, C put 60 Oxen for 3 months. What is the rent paid by C ?

$$\begin{array}{rcl}
 A : B : C = 30 \times 4 : 40 \times 5 : 60 \times 3 = 6 : 10 : 9 & & \\
 25 \text{ -----} & 50000 & (\times 2000) \\
 C = 9 \text{ -----} & ? = 18000 & (\times 2000)
 \end{array}$$

13. A, B and C capitals are in the ratio 2 : 3 : 4, and their time periods are in the ratio 1 : 2 : 3, then find their profits ratio ?

$$\begin{array}{l}
 \text{Profit} = \text{Capital} \times \text{Time period} \\
 \text{Profits ratio} = 2 \times 1 : 3 \times 2 : 4 \times 3 = 1 : 3 : 6
 \end{array}$$

14. A, B and C profits are in the ratio 1 : 2 : 3 and time periods are in the ratio 2 : 3 : 4, then find the Capitals ratio ?

$$\begin{array}{l}
 \text{Profit} = \text{Capital} \times \text{Time Period} \\
 \text{Capital} = \text{Profit} / \text{Time period} \\
 \text{Capitals Ratio} = 1/2 : 2/3 : 3/4 \\
 = 6 : 8 : 9
 \end{array}$$

15. A, B and C profits are in the ratio 2 : 3 : 4 and Capitals are in the ratio 3 : 2 : 1, then find the time periods ratio ?

$$\begin{array}{l}
 \text{Profit} = \text{Capital} \times \text{Time Period} \\
 \text{Time Period} = \text{Profit} / \text{Capital}
 \end{array}$$

$$\begin{aligned}\text{Time Periods Ratio} &= 2/3 : 3/2 : 4/1 \\ &= 4 : 9 : 24\end{aligned}$$

***“For every dream of cracking an exam or landing a job,
an APTITUDE Book is your secret MENTOR”***

**PRACTICE PROBLEMS**

1. A, B and C started a business each investing Rs.10000. After 4 month A withdraws Rs.3000, B withdraws Rs.4000, C invest Rs.3000 more At the end of the years, a total profit was Rs.32800. Find the share of C.

- A. Rs. 10000 B. Rs. 14400 C. Rs. 17600 D. Rs. 19200

2. Joey started a business and he invested in 38000, After some month, amar came to join with him and invest 28500. The end of the year the total profit was divided among them into ratio form 16: 8. Find after how many months did amar join.

- A. 4 B. 6 C. 8 D. 3

3. Shakeel started a software business by investing Rs. 20,000. After six months, Neel joined him with a capital of Rs. 30,000. After 3 years, they earned a profit of Rs. 13,950. What was Shakeel's share in the profit?

- A. Rs. 6200 B. Rs. 6400 C. Rs. 4200 D. Rs. 7750

4. A, B and C started a business by investing Rs. 250000 Rs. 300000 and Rs.350000 respectively. Find the share of B, out of an annual profit of Rs.187200.

- A. Rs. 65400 B. Rs. 62400 C. Rs. 63400 D. Rs. 66200

5. Abu and Salim started a partnership business investing some amount of money in the ratio of 4 : 6 . Shakeel joined them after six months with an amount equal to that of Salim . In what proportion should the profit at the end of one year be distributed among Abu, Salim and Shakeel ?

- A. 5:3:4 B. 4:6:2 C. 5:3:2 D. 4:6:3

6. Munna received Rs. 3000 as his share out of the total profit of Rs. 4500 which he and Raju earned at the end of one year. If Munna invested Rs.60000 for 6 months, whereas Raju invested his amount for the whole year, what was the amount invested by Raju?

A. Rs. 12000

B. Rs. 15000

C. Rs. 18000

D. Rs. 50000

7. Vimla started a business investing Rs. 90000. After 3 months, Pulkit joined him with a capital of Rs. 120000. After another 6 months, Alia joined them with a capital of Rs. 180000. At the end of the year, they made a profit of Rs. 40000. What would be Alia's share in it?

A. Rs 7000

B. Rs 6000

C. Rs 5000

D. Rs 8000

8. In business, Anuj and Chirag invested amounts in the ratio 4:2, whereas the ratio between amounts invested by Anuj and Bimal was 6:4, If Rs 314600 was their profit, how much amount did Bimal receive?

A. Rs 88000

B. Rs 98000

C. Rs 94400

D. Rs 96800

9. Clark got Rs.3000 as his share out of a total profit of Rs.4500 which he and Chintu earned at the end of one year. If Clark invested Rs.10000 for 6 months, where as Chintu invested his amount for the whole year, what was the amount invested by Chintu ?

A. Rs. 1000

B. Rs. 5000

C. Rs. 2200

D. Rs. 2500

10. Rs.1400 is divided among Amla, Bimla and Simla so that Amla receives half as much as Bimla and Bimla half as much as Simla. Then Simla's share is:

A. Rs. 200

B. Rs. 300

C. Rs. 800

D. Rs. 600

11. Simran started a software business by investing Rs. 50,000. After six months, Nanda joined her with a capital of Rs. 80,000. After 3 years, they earned a profit of Rs. 24,500. What was Simran's share in the profit?

A. 10500

B. 10000

C. 11000

D. 12500

12. Arun, Kamal and Vinay invested Rs. 8000, Rs. 4000 and Rs. 8000 respectively in a business. Arun left after six months. If after eight months, there was a gain of Rs. 4005, then what will be the share of Kamal?

A. Rs.800

B. Rs.890

C. Rs.900

D. Rs.1000

13. A began a business with Rs. 85,000. He was joined afterwards by B with Rs. 42,500. For how much period does B join, if the profits at the end of the year are divided in the ratio of 3 : 1?

A. After 4 months

B. After 6 months

C. After 8 months

D. After 9 months

14. A and B invest in a business in the ratio 3 : 2. If 5% of the total profit goes to charity and A's share is Rs. 855, the total profit is:

A. Rs.1200

B. Rs.1500

C. Rs.1000

D. Rs.1600

15. A, B and C capitals are in the ratio 2 : 3 : 4 and their profits are in the ratio 3 : 4 : 5, then find the time periods ratio ?

A.18 : 16 : 15

B.10 : 12 : 15

C.15 : 16 : 18

D.1 : 2 : 3
